A	<p>The diagram illustrates the electrical wiring for a PLC system. It features a power supply unit (PS1) and a PLC terminal block (Tsx psy 2600). The power supply is connected to the L and N terminals of the PLC. The ALARM and RELAY terminals are connected to a 24V source. A 5A fuse (F1) is connected to the power supply, and a 1.5A fuse (F2) is connected to the power supply. The diagram is labeled with 'X1', 'X2', '3-F2', and '3-G2'.</p>
